Profile

I am a UI/UX design student specializing in user-centered design and prototyping. With expertise in Figma, I create intuitive and aesthetically pleasing digital experiences. My foundation in Software Engineering enables me to design with technical feasibility in mind, ensuring scalable and effective solutions. A detail-oriented designer with strong problem-solving abilities and a collaborative mindset, I thrive in fast-paced environments, translating user needs into innovative design solutions. Passionate about creating impactful user experiences, I am eager to contribute my unique blend of design and technical skills to a creative team.

Education

National Institute of Business Management (NIBM) BSc (Hons) Software Engineering (Ongoing)	2025 Reading
National Institute of Business Management (NIBM) Higher National Diploma in Software Engineering	2024 – 2025
National Institute of Business Management (NIBM) Diploma in Software Engineering GPA: 3.70	2023 – 2024

Projects

NeoChargeMap - EV Charging Station Locator [🔗](#)

An Android application built with Kotlin that helps Electric Vehicle drivers find, navigate to, and log sessions at charging stations.

My Contribution:

I was responsible for all features involving user-specific data, which I architected to be stored in Firebase Firestore for security and multi-device access.

Key Achievements:

- Database Architecture
- Real-Time Data Synchronization
- Full CRUD Operations
- Data Privacy & Design

ChronoCompiler [🔗](#)

A web-based educational compiler with real-time execution visualization and time-travel debugging capabilities, built with React, TypeScript, and modern compiler techniques.

My Contribution:

- implementing time-travel debugger feature with state snapshotting and execution history
- Designed and implemented the complete UI/UX with live AST visualization
- Architected React state management for real-time compiler execution tracking

Key Achievements:

- Time-Travel Debugger
- Real-Time Visualization

- UI Architecture
- User Experience

Indian Spice Food E-Commerce Website

A fully responsive website developed using HTML, CSS, and JavaScript that allows customers to order authentic Indian foods online with home delivery.

Key Functionalities:

- Provides an online catalog for users to browse various Indian food items.
- Allows customers to select desired spice items and add them to a digital shopping cart.
- Manages the online ordering process and facilitates the home delivery of purchased goods.
- Features a user-friendly interface for a seamless browsing and checkout experience.

E-Book-Management-system

A desktop application developed in Java that digitalizes the book purchasing and delivery process.

Key Functionalities:

- Provides a digital catalog for users to browse and search for books.
- Allows customers to select and purchase books.
- Manages the order processing and coordinates home delivery of physical books.
- Handles user accounts and transaction details securely.

Technical Skills

Languages

• HTML, CSS, JavaScript, PHP, Python, Kotlin

Technologies and Tools

Git, Figma, MySQL, Firebase, React, Node.js

UI Design

Visual Design, Color Theory, Responsive Web Design, Mobile App Design

UX Methods

User Flows, Wireframing, Prototyping

Soft Skills

- Leadership, Communication, Teamworking and Collaboration.
- Time Management, Attention to Detail and Problem Solving
- Adaptable.

Certificates

Advanced UI/UX Designing

ADB Bootcamp

Website UI/UX Designing

SimpliLearn

Volunteering

Member, IEEE Student Branch

National Institute of Business Management (NIBM), Matara

2025
